

STUDENT ENGINEER/ DRAFTSPERSON

TUFF Australia is renowned for the quality of its products which are sold across Australia and overseas. With continued strong business growth TUFF Australia is looking for a passionate student engineer/draftsperson to assist our Research & Development team in our head office in Toowoomba QLD.

TUFF manufactures a range of premium 4x4 accessories including bullbars, utility trays and truck bodies. TUFF products are chosen by leading rental companies, agricultural enterprises, contractors and government agencies due to their durability and performance in the most demanding conditions on earth. The TUFF family is 100 strong and growing thanks to the support of our expanding client base.

The ideal candidate would be someone who is currently studying engineering or who has just completed their degree. This is initially a casual position with a potential for permanent employment opportunity, helping the team with 3D & 2D drawings for all the parts / builds we use.

Your Duties will include:

- Creating an exhaustive parts library in SolidWorks(or equivalent) using samples provided on site.
- Prepare drawings for clients & manufacturing.
- Provide drawings and technical specifications that reflect the client or project needs.
- Working closely to our Research & Development supervisor
- Create and modify drawings as required to ensure best result.

Team Member Benefits:

- Access to our Employee Assistance Program
- Excellent remuneration
- Great team to work with

The role requirements:

- Basic to intermediate knowledge in SolidWorks (or equivalent)
- Knowledge of TrailerWin software would be highly regarded.
- Sheet metal experience is desirable.
- Understanding of basic welding principles is highly regarded.
- High attention to detail.
- Can work autonomously.

You will be part of a team of two qualified engineers and will report to the Operations manager. On the job training will also be provided.

You will be a person who enjoys working in a great team environment, yet can work well under pressure by focusing on the right priorities at the right time. Ideally, the successful candidate will be a very passionate, self-motivated, enthusiastic administration professional who enjoys a diverse working environment. This role is for casual employment with hours by negotiation between 7.00am - 4.00pm Monday to Friday.

All applicants need to address the role description and role requirements in their cover letter and submit a resume with a minimum of 2 (two) phone references via www.tuffaustralia.com.au/careers

For your opportunity to be part of a truly diverse, supportive organisation that believes its people provide the platform to its success, apply now or contact Mechanical Design Engineer Ruhaan Kanpurwala for further information on (07) 4615 0025 or via email: ruhaan.kanpurwala@tuffbullbars.com.au
